## BMW 220d M Sport Coupé – Road Test

Published: July 25, 2022

Author: Robin Roberts

Online version: <https://www.wheels-alive.co.uk/bmw-220d-m-sport-coupe-road-test/>

The BMW 220d M Sport Coupé put through its paces by Robin Roberts (and Miles Better News Agency)...

To those of a certain age there was only one style of sporting car with some room for the

family, a rear-wheel-drive coupé and this simple formula mix are the ingredients in the BMW 220d M Sport we have just tested.

Front wheel drive hot hatches largely replaced the iconic ideal must-have for enthusiasts but they never replaced the balanced handling and driving satisfaction of a RWD coupé.

BMW itself has built some memorable FWD hatchbacks but for a lot of their owners they are in a different class to RWD cars and the seductive curves of a coupé. The thoroughly practical hatchbacks contrast with the stylish sportsters and as incomes rise and families move on, a lot of hatchback drivers have been looking at coupés.

The cost of the standard 220d M Sport Coupé was £36,420, plus delivery and including special paint, but the comfort and technology packs added £1,975 to the price.

No-one could be disappointed with the BMW 220d M Sport Coupé and its highly refined and sophisticated interior, sublime powertrain and bewildering electronic driver aids and systems to extract the widest smiles from the driver and passengers.

It has a very good respectable performance, with its long-legged gearing and unburstable diesel engine rumbling away under the long bonnet the economy was excellent over our 356 miles test. Get it into the right sweet-spot of the rev-range and the thumping power comes out and is put onto the road by the rear wheels in a very positive and drama-free manner.

While not the quickest in its executive coupé class, either accelerating or attainable maximum speed, the BMW 220d M Sport Coupé is arguably the most refined and easiest to drive as the ZF gearbox has auto and manual selection to suit driver's tastes.

And did we mention that fuel economy of well over 50 mpg at a time when prices are soaring and diesel is still making a lot of sense for the high mileage driver in particular?

There is very little lag when accelerating from rest, even less when overtaking on the move and the wonderfully slick automatic changes mean miles just disappear whether in town or country.

Drive it really hard and there was a little jerkiness from the powertrain but ease off the throttle a bit as it neared the red line and there was just smoothness between ratios.

Now I've always been a fan of BMW brakes and the 220d did nothing to affect my memory of their lightness, precision and power while the electronic parking brake was like an anchor on our weekly test hill. Some testers have reported the brakes being difficult to judge a smooth stop but I have never had an issue.

Turning to the steering – see what I did there – and the system in its normal mode is nicely balanced and imparts good feedback, but you have an electronically weighted sport mode which can be selected and this is more imagined than real but effective nevertheless. Ours came with a heated wheelrim.

The steering, brakes and gearchanges can be modified through a driver assist system that goes from standard to either sport or eco-pro settings and in the latter even enters more variables to optimise economy, changing the instruments' display along the way to emphasise aspects of the desired performance. Selection is immediate and noticeably different.

What it does not do is vary the suspension rates, which are fine for me, but occasionally the system struggled to absorb the worst bumps and potholes and contrasted with the otherwise uniformly smooth action through a multi-link rear and front McPherson strut system.

This meant the BMW 220d M Sport Coupé was a very predictable drive, entirely safe and surefooted with lots of grip from the 18-inch wheels and low profile Michelin tyres.

Secondary controls were plentiful but the gearbox 'paddles' and indicators or wipers were hidden behind the wheel-spokes which carry buttons for navigation/ infotainment/ cruise control and need some familiarization. They worked in conjunction with the push buttons on the big central multi-function display and the BMW i-Drive on the central console.

A separate row of buttons worked the climate control and it was highly effective on some of the hottest days of the year and even gave the two rear seat occupants control over their space.

Oddments room was very good for a family car with large door bins, seat pockets trays and recesses throughout the cabin and I liked the ski-hatch between the back seats for long items, and this which could be shut off or dropped down to reveal two cup holders. Little space has been wasted.

Looking at space, the boot is of a reasonable size with a low loading lip, not a lot of height but good width and length.

Climbing into the back seats was not so easy with a very slow acting electric sliding mechanism to move the front seats once the squabs were lifted by a manual release, and

then only two children could squeeze in with short leg and headroom available.

The high waistline contributed to the feeling of being cocooned.

Very wide-opening pillarless front doors gave unrestricted front seat access and all seats were deeply shaped and nicely covered on the test car in faux suede and leather but one passenger said they did not support where desired in the small of the back. I liked the adjustable under-knee support, while electric memory and heating were features of our front seats.

Apart from the restricted vision for the rear seat occupants, the driver and front seat passenger had good, uninterrupted sight lines nearly all around, save for the wide rear coupé pillar, and the test car had a comprehensive set of sensors and cameras including an overhead view, to assist with parking.

Intelligent headlights and wipers ease driving in bad light and wet weather and there is no rear wiper as airflow keeps the glass clear of rain. The A/C kept the interior clear and electrically heated and adjusting door mirrors were big and provided a good field of view.

With so much effort put into the refinement of the BMW 220d M Sport Coupé you may be 'disappointed' by the quietness of the car considering its competition credentials. Well, it is uncommonly quiet when rolling along but you can produce some busy notes from the engine under hard acceleration in Sport mode but that's about it.

Expected road rumbles are very low, wind noise non-existent and other mechanical sources were muted. Even the doors just close with a woosh, not a thud.

## VERDICT

If you enjoy your motoring and don't want an ultimate performance coupé with higher fuel and insurance costs it would be hard to beat the BMW 220d M Sport Coupé at any age.

**For:** Extremely smooth powertrain, agile, sophisticated interior, excellent build quality, quiet, very good economy, superb handling.

**Against:** Limited rear seat leg and headroom, low bootspace, short ground clearance, occasionally stiff ride with low profile tyres even in comfort mode.

## FAST FACTS

### BMW 220d M Sport Coupé

Price: £39,220

Mechanical: 190 bhp 4 cyl 2.0 electric turbo-diesel, 8 speed auto RWD

Max Speed: 147 mph

**WHEELS-ALIVE!**

[www.wheels-alive.co.uk](http://www.wheels-alive.co.uk)

---

0 - 62 mph: 6.9 sec

Combined MPG: 55.9

Insurance Group: 29

CO<sub>2</sub> emissions: 123 g/km

Tax costs: BIK rating 29%, VED First Year £180 then £510 annually for 5-years

Warranty: 3 years/ unlimited miles

Size: L 4.54 m (14.90 ft), W 2.07 m (6.79 ft), H 1.39 m (4.56 ft)

Boot space: 390 litres (13.77 cu.ft)

Kerb weight: 1,655 kg (3,649 lb)
