Ford Mustang Fastback 5.0 Manual...

...Assessed by Robin Roberts (and Miles Better News Agency)).

At first you may not see a similarity between San Francisco and my home town of Barry, South Wales. But I've found a connection, they are both good places to test the Ford Mustang Fastback GT.

With its burbling 5.0 V8 normally aspirated petrol engine underfoot a road test takes on a new aural significance and the town's steeply sloping streets, horizontally split by connecting roads, really tests the suspension and the torque under the hood, sorry bonnet.

The Mustang is available as Fastback coupé or convertible, both with four seats and 290 hp,

317 hp and 440 hp, 2.3 litre four cylinder turbo engine and 416 hp or 450 hp 5.0 litre V8 petrol engines with six speed manual or automatic transmissions - plus a mighty 10-speed auto on top spec versions. There are four custom packs to up-spec the model but all are rear wheel drive only.

Our test car was fitted with the £1,600 optional fluid suspension so there was no bottoming of the chassis over the bumps and lumps of Barry's streets. Driving could still have looked like a scene out of the classic 1968 film, except there were no baddies chasing us and I drive sedately Officer. So the suspension passed its test, what about the rest of the car?

A big yes. There is every reason to go for the 5.0 V8 over its 2.3 four cylinder siblings, so powerful, responsive and flexible is this classic American V8.

It can be driven 'grandma gently' or 'cowboy crazy' and anywhere in between as it responds to every input with a sharpness coupled with comfort which is so lacking in most UK or European made sports cars.

That big engine has a wide power spread and up to 529 Nm (390 lb.ft) at 4,600 rpm so it can be eased along, or making use of the six manual gears it zips to 60 mph in under 4.5 seconds, and is positively ambling at the UK legal maximum on motorways.

Gearchanges are direct and quick with a good progressive clutch action, a short throttle stretch and if you need them very good powerful brakes with excellent feel building up underfoot. The handbrake is a bit of a stretch and that was weak on the test car as well, not ideal on the slopes we were using.

The Mustang GT's steering was nicely balanced between feedback and action, with a good turning circle, no kickback and for its size it felt smaller and more agile than you might expect.

With so much power to the rear, the car felt a bit tail-happy but it was all beautifully balanced and you could exploit and enjoy it in safety with only a slight tendency to run wide on tighter turns quickly taken.

The secondary controls were usual stalks and buttons grouped around the wheel spokes and the driver could also select various modes for the responses of engine and suspension from a console display which went from comfort to competition in character, although the latter is best kept for circuits or drag strips. Driven more sensibly, the suspension could be soft or hard with the fluid system optional fitting. It really worked well.

Instruments were classically big and very clear with well marked dials and no reflections, backed by warning lights and with a wide range of settings and operations for the heating and ventilation as well to fill the cabin with air.

For the driver and front seat passenger the seats were very wide and long with a multitude of adjustment room and it really is a car you could use to drive across America, or up and down Wales for that matter.

In the back, access needed a bit of bending but once there the seats were also well padded and comfortable even if the headroom was more restricted than those in front.

I liked the boot space but the opening wasn't huge even if the capacity behind was generous, flat, wide and long.

With any Fastback coupé, visibility can be an issue as the roofline sweeps to the tail and the Mustang was no exception. You needed the parking aids but to the sides and front there were good sightlines, screenwash and wipers were excellent and quickly cleared big areas of glass, and at night the bright headlights were welcome.

VERDICT

The Mustang GT really felt a different sort of sports Fastback coupé to the mass of high tech models from the UK and Europe, with similarities to some classic Japanese sports cars.

This classic American sports car is very good at a lot of things without being too clever for its own good. It is not a cheaper alternative to its foreign rivals, but it stands out as different and one I would be happy to live with, in San Francisco or South Wales.

WHEELS-ALIVE!

www.wheels-alive.co.uk

For: Powertrain, acceleration, torque, very roomy, good boot and comfortable optional adaptive suspension, iconic American muscle car styling.

Against: Average warranty, high insurance and running costs, noisy for some, weak handbrake.

Mini Milestones and Wheels-Alive Tech. Spec. in Brief:

Ford Mustang GT Fastback 5.0, V8, manual, two door.

Price: £46,560 as tested

Mechanical: 450 hp, 5.0, V8, petrol, six speed manual.

Performance: 155 mph, 0-62 mph 4.6 seconds.

Fuel consumption: Combined Cycle 23.9 mpg (25 mpg on test).

Emissions and taxation: CO2 emissions: 277 g/km, VED First Year road tax £2,135, Standard rate £145 + £310 annual supplement for five years as it costs over £40k, BiK company car tax 37%.

Insurance Group: 45.

Warranty: Three years/60,000 miles.

Sizes: L 4.79 m (15.72 ft), W 1.92 m (6.30 ft), H 1.29 m (4.23 ft), boot space 408 litres (14.41 cu.ft), two doors/four seats.
