New Volvo S90 and V90 Premium Brand Executive Models Arrive.

By Robin Roberts and Miles Better News Agency.

Swedish swish and sophistication come as standard in the latest Volvo S90 and V90 series...

The new large premium saloon and estate models in Momentum or Inscription trims embody features from the large XC90 SUV with an emphasis on “relaxed confidence” through design, driving technology, connectivity and a reputation for advanced safety.

They are the latest to be built on Volvo’s scalable product architecture where the only fixed point is the distance from fascia to mid-point front axle and all other measurements are varied to suit the particular car. The saloon is 4.96 metres (16.27 ft) from nose to tail and

has a 500 litres (17.77 cu.ft) boot, but with a small opening, while the similar length estate takes a minimum 560 litres (19.78 cu.ft) rising to 1526 litres (53.89 cu.ft).

At the other end, the launch models get a choice of the company's Drive-E range of 190 or 235 hp 2.0 litre diesel four-cylinder engines and 8-speed automatic transmission. The 190 hp engine has front wheel drive and the 235 hp comes with AWD. A sporting R-Design is due soon and next year will see the addition of a petrol-electric T8 Twin Engine plug-in hybrid which does 28 miles from a charge.

Also available from Volvo's tuning division - Polestar - is a Performance Optimisation package costing £835. This marginally increases power/torque outputs but gives sharper engine and gearshift responses.

The most powerful diesels use power-pulse compressed air induction to boost the turbocharger at low engine speed and quicken acceleration from rest and without any pollution. Volvo's new wishbone front suspension and rear multi-link system with composite transverse leaf spring is used to give better feedback and aid roadholding and there are touring and sporting options.

A new concave grille inspired by that in the P1800 sets the new S90 and V90 models apart and the light units resemble the forge-hammer silhouette adopted by Volvo on previous models. Inscription models get black and brightwork detailing.

Inside there is a lot of glass area and a big sunroof is available, lines are simple and clean with high quality leather and wood trim together with some chromed detailing and Bowers and Wilkins sound system.

Volvo has made much of the new cars' connectivity and telematics and there is a 9-inch

central information screen with voice control which can be linked to the user's mobile phone and Sensus wifi with downloadable applications to assist giving the owner remote data and enabling some features to be set up in the car from home or office. The system also works with the garage to alert them to any issues and advise on checks or servicing and in emergencies acts as an automatic beacon for rescue services.

For the driver the new Volvos get enhanced pilot assist to keep the car centred in road lanes working with run-off mitigation and protection but it also for the first time has large animal detection built into the city safety feature, to alert the driver to objects in the road apart from pedestrians and cyclists, and significantly will pick up sheep or small deer.

Volvo will not be drawn on anticipated sales of the new series but believe it will make the models more attractive to executive car buyers and expect a roughly one-third split between Momentum, R-Design and Inscription models as the full series is introduced by 2017.

The last V70 estate held eighth place and the S80 was 13th in the table of popular premium cars but with the new models, Volvo in Britain expect the estate to climb to fifth place and the saloon to eighth position. Within those sectors the front wheel drive versions are likely to take 70% and AWD some 20% with the forthcoming T8 Twin Engine just 10%.

There are six models in each saloon or estate range with a starting price of £32,555 for the four door saloon and £34,555 for the five door estate, and rising to £42,055 and £44,055 respectively. For a 40% tax payer it means they will be liable for £249.17 ppm to £350 ppm in a saloon and £264.50 to £366.67 ppm with the estate.

Stefan Sallqvist, senior product manager for the new models, said that the newcomers were not meant to be as dynamically challenging to drive as some rivals but Volvo sought to give drivers "relaxed confidence" behind the wheel. "Our all new suspension and assistance systems set industry leading standards of safety, building on our reputation for safety first.

"The front wishbone suspension and rear multi-link system with transverse composite leaf spring make the cars very comfortable and highly controllable so a driver can feel a gentle

roll through bends, and not a sudden change of attitude,” he said.

FIRST IMPRESSIONS

Volvo built its reputation on safety for occupants, now it's extended that to saving sheep. Volvo and the RSPCA should join forces with the new pilot assist system on the 90-series

fitted to warn the driver of sheep and deer on the road and automatically slow the car to reduce injury or death.

It is one of the latest features developed for the new range of saloons and estates, alongside camera systems which keep a car in the middle of a road-lane, and alert emergency services if you have a bad crash.

Systems also monitor the car's health and send information to your garage if something needs attention or its due for a service. The technology is brain-bashing in its abilities but fairly easy to use, even if a little frustrating at times when the lane-watch switched off momentarily passing cones on a motorway hard-shoulder.

We tested both saloon and power-pulse boosted 2.0 litre diesels, and found the latter much more responsive and a better unit in the near 1,700 kg (3,748 lb) cars. The standard D4 engine is good make no mistake, but the D5 is sharper, although it also proved thirstier at 36 mpg overall compared to nearly 43 mpg in the stablemate.

Gearchanges were smooth, the ride occasionally firmer than I expected, but the steering needs more feeling put into the system for this driver. Brakes were excellent.

Whether you go for saloon or estate you'll not be shortchanged on space as they are both very roomy throughout but the four-door's boot opening is not large despite it having a big capacity.

VERDICT

The overall impression it left with me is that this is a very safe car, especially for sheep.

For: Roomy, comfortable & stable, economical, good performance at low and top end.

Against: Felt heavy and big in country lanes, lacked mid-range punch and hard riding over some roads.

Milestones and Wheels-Alive Tech. Spec. in Brief:

Volvo S90 Saloon D4 Inscription.

Price: £35,555 but £47,380 as tested with winter-plus packs & individual options.

Engine/transmission: 2.0 litre, four cylinder, 190 hp turbo-diesel, 8-speed automatic.

Performance: 140 mph, 0-62 mph: 8.2 seconds, 42.8 mpg on test.

Emissions and taxation: CO2 116g/km, VED £0/£30, BIK company car tax 23%.

Insurance Group: 28

Warranty: Three years/ 60,000 miles.
