motorsport. The ID. R is the racing forerunner to the new ID. product family – Volkswagen's wide range of purely electric vehicles to be launched from 2020.

"We are really looking forward to working together with Bridgestone in motorsport for the first time," says Sven Smeets, Volkswagen Motorsport Director. "In attempting to crack the e-record on the Nordschleife, we want to underline the enormous performance potential of

electric drive," explains Smeets. Volkswagen has already set a new all-time record in with the ID. R at the famous hill-climb at Pikes Peak (USA) in 2018.

At the moment, Bridgestone and Volkswagen already enjoy a partnership in the manufacture and development of original equipment for production vehicles. "Both brands have a real focus on future technology and innovation," says Mark Tejedor, Vice President Original Equipment at Bridgestone EMEA (standing for 'Europe, Middle East and Africa'). "We have utilised our expertise in motorsport and electro-mobility to develop Potenza sports tyres that are specially adapted to the demands of an electric race car. The tyres deliver the confidence and the performance to help Volkswagen Motorsport break new lap time records."

Current record: Under seven minutes over nearly 21 kilometres.

At 20.832 kilometres, with 73 corners and an elevation change between the highest and lowest sectors of around 300 meters, the Nordschleife at the Nürburgring is one of the most challenging racetracks in the world, with former Formula 1 world champion Jackie Stewart coining the track in the Eifel "Green Hell". The current lap record for a purely electricpowered vehicle stands at 6m 45.900s, held by Briton Peter Dumbreck (NIO EP9).
